ACKNOWLEDGEMENTS

I would like to thank the almighty **GOD** and seek blessings from him, who has blessed and protected me over the years. To those unwittingly unsung my sincere thanks.

My deepest gratitude to **Dr. Ashok Kumar Sharma**, Professor & Head of Department of Radio-Diagnosis. Grateful for their unique perspectives and knowledge that have truly enriched my learning experience.

Words can hardly express the sense of indebtedness to my esteemed teacher and Guide **Miss. Neelam Rao Bharti,** Assistant Professor of department of Radio-Diagnosis, Thank you for invaluable guidance and support throughout my thesis journey.

I would my sincere thanks to my Co-Guide **Mr. Himanshu Mishra**, Assistant Professor of department of Radio-Diagnosis, for their continuing support, valuable suggestion & helpful attitude to undertake this research work.

I would like to thanks **Dr. Bhawana Solanki**, for her help and advice for my thesis.

I wish my thanks to. **Miss Kirti Bhardwaj,** Assistant Professor of Biostatistician Department of Central Research Facility of Santosh Deemed to be University, she help me in statistics analysis of my result.

Words defy me to express my deep sense of debt and gratitude to **Dr. S.N. Singh**. His encouragement and guidance have the impossible to possible. I am incredibly thankful for his endless help, unwavering support and assistance during completion of my thesis. Appreciate all the effort you put in to help me succeed.

I am really thankful to and **Dr. Pooja Pandey** and **Dr. Shreya Shukla** for their guidance and support.I am feel greatful to her valuable suggestion and afforts.

I want to give a heartfelt shout out to my amazing beloved **Family**, their unwavering support, and understanding have been my rock throughout my thesis journey. This achievement is as much their as its mine. Thank you for being my constant pillars of strength and inspiration.

I also want to thanks my all **Batchmates** for their encouragement and insightful discussions.

I would like to thanks to all technical and non-technical staff who help me in my research work. I'm truly thankful to all who have contributed to the completion of my thesis.

Km. Divya Gupta

ABSTRACT

Aim- The survey on awareness of breast cancer of attitude, knowledge and practice among women.

Method- The study was to determine how well women know about basic evaluation of study based on a Google Forms questionnaire. The information was collected from 346 patient's relative 1st degree attain-dent from Radiology department and the female patient came in OPD, IPD and Emergency in any department of Santosh hospital. The survey consisting of 30 questions covering various parameters to evaluate the awareness levels of subjects about SUBJECTIVE DATA, including how to recognize, avoid, what is Susceptibility, Severity, Benefits, Barriers, Cues to Action, Self-Efficacy, Knowledge, Attitude and Practice. The poll also gathered demographic information, such as the participants' age, Marital Status, Occupation, most significant level of education and alcohol consumption.

Conclusion - Most female respondents reported being generally uninformed, lacking awareness and understanding, and seeing hurdles related to breast cancer. Personal information and the occupation and marital things strongly co-related with breast abnormal growth. The main perceived impediments were lack of information, fear, shyness, and an inadequate awareness program. Our findings imply that women's knowledge of BSE and breast cancer varied despite most participants being aware of BSE. This indicates the necessity for quick actions to educate females about breast cancer and BSE.

Keywords: Understanding of abnormal growth of breast, BSE, evaluation level.
